Dream11 User Manual

Overview

Dream11 is an Indian fantasy sports platform where users can play daily fantasy sports contests, primarily focusing on cricket. The platform allows users to create fantasy teams, participate in contests, and track performance through a point-based system.

1. Getting Started: Login or Sign Up

- To begin using Dream11, open the platform's official website.

- On the landing page:

  - **For New Users**: Click **Sign Up** and create an account.
  - **For Existing Users**: Enter your username in the provided text box and proceed by clicking **Next**.

2. Customizing Your Homepage: Selecting Favorite Teams

- Upon logging in, users can personalize their homepage by selecting their favorite teams:

  - Browse the list of teams displayed on the screen.
  - Use the search bar to quickly find specific teams by name.
  - Click on the logos of the teams you like to select them.
  - After selecting teams, you can:
    * Click **Next** to save preferences and proceed.
    * Skip this step if no preferences are desired.

3. Navigating and Selecting Matches

Viewing Matches

- The dashboard displays two sections:
  - **Featured Matches**: Based on your selected favorite teams or popular contests.
  - **All Matches**: A complete list of available matches.

- Filter matches by date using the calendar tool on the right side of the screen.

- Select a match by clicking on it.

Understanding Match Selection

- If the match is scheduled for the chosen date:
  - You can proceed with your current Dream11 squad or make adjustments.

- For upcoming matches or custom contests:
  - You may create your own match by selecting a squad of 22 players.

4. Creating Teams

Building Your Dream11 Team

- After selecting a match:
  - Choose players for **Team A**:
    * Use the search bar to find specific players.
  - Repeat the same process for **Team B**.

- Ensure you select players strategically to maximize the team's performance.

Generation of the Final Team

- Once the initial selection is complete:
  - A dream team of 11 players is automatically generated.
  - If you are unsatisfied with the generated team, drag and drop a player from the remaining squad into the "Drop Player Here" area.

- Player cards display detailed statistics and current points, aiding strategic decision-making.

- Confirm the team lineup by saving your selections.

5. Using the Custom Match Option

- The custom match feature allows you to:
  - Select the type of match you wish to play.
  - Build two teams (Team A and Team B) by searching for and adding 22 players.
  - Alternatively, use the **Import from CSV** option to upload a pre-selected list of players.

6. Additional Features and Tips

Player Statistics

- Player cards provide in-depth statistics and point summaries, helping users make informed decisions.

Total Dream Points

- This feature displays the cumulative score of your chosen Dream11 team based on performance metrics.

FAQs for RAG Model Integration

How do I log in to Dream11?

- Open the platform's website and enter your username on the login screen. If you are a new user, click **Sign Up**.

How can I select a match?

- Use the dashboard to browse featured or all matches. Filter matches by date with the calendar tool and click on your desired match.

What is the process for creating a team?

- Select a match.

- Choose players for Team A and Team B.

- Customize the generated team if needed, and save the lineup.

Can I create a custom match?

- Yes. Use the custom match option to manually build two teams of 11 players each or import a CSV file with the required players.

Where can I view player performance data?

- Player cards in the team creation section display detailed stats and points.
